

Healthy eyes with Safe2C - natural improve eyesight

Protect your eyes!

**Safe-to-see food supplement has been designed specially so that you could always say:
I see fine!**

We seem to care fully for ourselves: sports, proper diet, spa treatment and cosmetics... We protect our skin against the aggressive urban environment, take care of our heart in case of stresses, train our muscles to gain their proper tone... Still, somehow we keep forgetting to care for our eyesight. But in fact the eyesight needs some quite special protection, because in the contemporary world our eyes get subjected to tremendous loads!

Depending on the season we have to constantly adapt to different lighting: bright sunshine in the daytime and artificial light – at night... Flickering computer monitors and neon signs, television and mobile phones... Reading in transport and various bad habits – the eyes get tired and in time your eyesight loses its acuity.

Safe 2C (Safe-to-see) contains omega-3 polyunsaturated fatty acids, lutein, β -carotene, vitamins B2 and E, zinc, selenium and bilberry extract.

Regular use of biologically active food supplement Safe-to-see contributing to the improvement of visual acuity, reduce signs of eye strain and reduce the risk of developing eye diseases. The main component of Safe-to-see are the polyunsaturated fatty acids, necessary to keep eyes in good condition.
